

Brow Lamination

Step 1

Clean the eyebrows with Angel Care Foam to remove any makeup. Before starting the treatment make sure they are dry.

Step 2

Apply very little **Angel Glue** on the brow hair and comb them in the desired direction using B&L Brush or Silicone Mascara Brush in case there is stubborn brow hair.

Step 3

Once the brow hair is in the desired direction, apply **GET READY Step 1** on the brows with the Angled Brush. Let it sit for 3 minutes on thin hair and 5 minutes on thick hair. Comb the hair with B&L Brush.

Step 4

Remove **GET READY Step 1** with DRY Angel Cotton Buds in the direction of the brow hair growth. Do not use water.

Step 5

Apply **SET Step 2** on the brows with a clean Angled Brush and let it sit for 10 minutes.

Step 6

Remove **SET Step 2** with a wet cotton pad.

Step 7

Apply **GO** Brow Styling Gel on the brows from the root towards the tip to create perfectly sculpted eyebrows using a disposable Mascara Brush.

WARNING!

*In case of contact with the eye, rinse immediately with plenty of water. Keep out of the reach of children.

**It is very important to keep track of time to avoid over-processing.

***May cause allergic reaction. Please test the product on the skin before performing the treatment to prevent an allergic reaction.

Lash Lifting

Step 1

Use an oil-free makeup remover to clean any makeup from the eyelashes and eyelids before starting with the Lash Lifting treatment.

Step 2

Place eye patches or Eyelash Tape under the eyes, covering the lower lashes to avoid any lashes from curling upward.

Step 3

Apply Silicone Pad on the eyelid. When choosing a Silicone Pad, please consult the client to understand their lash curling style and take their natural lash length into consideration.

Step 4

Use **Angel Glue** to attach the Silicone Pad to the lid, as close to the lash line as possible. This is very important to get optimal curling results. Place the Silicone Pad from the inner corner of the eye moving outwards. Press and hold the Silicone Pad for 5 to 10 seconds until the glue adheres to the lid. Add more glue if you are having difficulty securing the Silicone Pad

Step 5

Start gluing the lashes to the Silicone Pad. Divide Silicone Pad into 3 sections. Add **Angel Glue** to the 1st section and lift the lashes up to the Silicone Pad, then proceed to the 2nd and 3rd sections. This will prevent the glue from drying quickly. Use the Lash Lifting Tool and B&L Lifter to separate and lift the lashes to the Silicone Pad. Start lifting the lashes upwards. Use as little glue as possible! Make sure that all the lashes are attached to the Silicone Pad and perfectly lifted. The lashes will remain the way they were placed and glued to the Silicone Pad.

Step 6

Make sure the lashes are perfectly placed on the Silicone Pad. Once the lashes are all in place, apply **GET READY Step 1** to each lash. With the Angled Brush apply a thin layer of **GET READY Step 1** to the eyelashes, starting from the outer corner of the eye, moving towards the inner corner. Let it sit for 4-5 minutes on thin eyelashes, 5-6 minutes on average eyelashes, and 6-7 minutes on thick eyelashes. Each eye should be timed separately. You **MUST AVOID** applying the solution on the lash root and the ends of the lashes.

Step 7

Make sure to thoroughly remove **GET READY Step 1** with dry Angel Cotton Buds. DO NOT use water.

Step 8

Apply **SET Step 2** to lashes with a clean Angled Brush. Let it sit for the full 10 minutes. Keep checking with your client to make sure their eyes are not burning.

Step 9

Remove **SET Step 2** with wet cotton pads.

Step 10

To remove the Silicone Pad and **Angel Glue** leftovers from the skin massage the Silicone Pad with gentle circular motions. Make sure the eyelashes are no longer glued before you remove the Silicone Pad. After removing the eyelashes from the Silicone Pad comb them up.

Step 11

Apply **GO** to clean lashes. This product is used as the final step of the treatment and as a daily care regimen at home.
